Claim Rejections – 35 U.S.C. 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 13, 14, 16-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Lipkin (US publication 2002/0073080).

Lipkin discloses a processor database search system comprising:

- a database (513) for storing a document file;
- a database control unit (521) for controlling a transfer of a document file to and from said database;
- a search engine (paragraph 0009) for searching the database on the basis of keywords comprised of characters (See paragraph 0423);
- a data file for use in a search process by means of said search engine, for retaining information indicating a correspondence of the keyword to positional information of the keyword based on a field in the document file that includes the keywords (See paragraphs 1004).

Lipkin also discloses that the browsers to read the file (See paragraph 0548), the processor extract text values (See paragraph 1182), FinderManager for executing database queries (See paragraph 0087).

Further, Lipkin discloses table for containing string (See table CWU and paragraph 0503).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McGreevy (US publication 2002/0188587) discloses a system for generating phrases from a database.
